

Create anything in a snap, from presentations and logos to social media posts and more.

What can Canva ChatGPT Plugin do?

The Canva plugin in this environment has a specific capability:

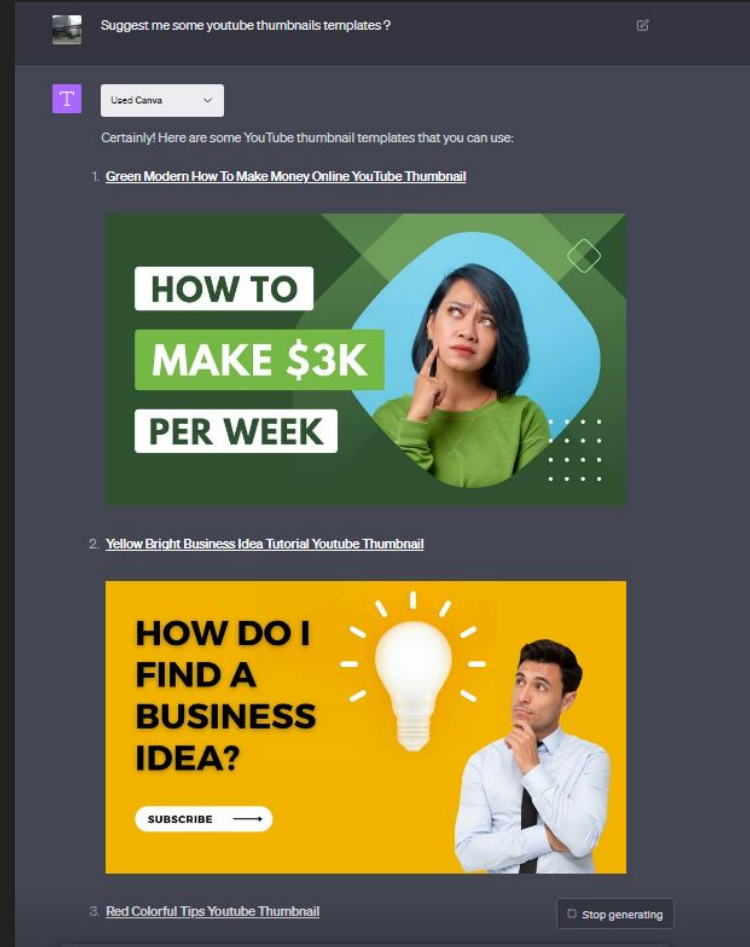

- it allows me to search for Canva templates based on a brief description you provide.
- This can be for various types of designs like social media posts, presentations, posters, brochures, and more.

Here's how it works:

1. **Template Search:** You tell me what kind of design you're interested in creating (e.g., "Instagram post for a product launch," "brochure for an Italian restaurant," etc.).
2. **Locale:** Optionally, you can provide your language and country code (e.g., "en-US") to get templates that are more relevant to your location.
3. **Suggestions:** I'll then provide you with a list of Canva templates that match your criteria.

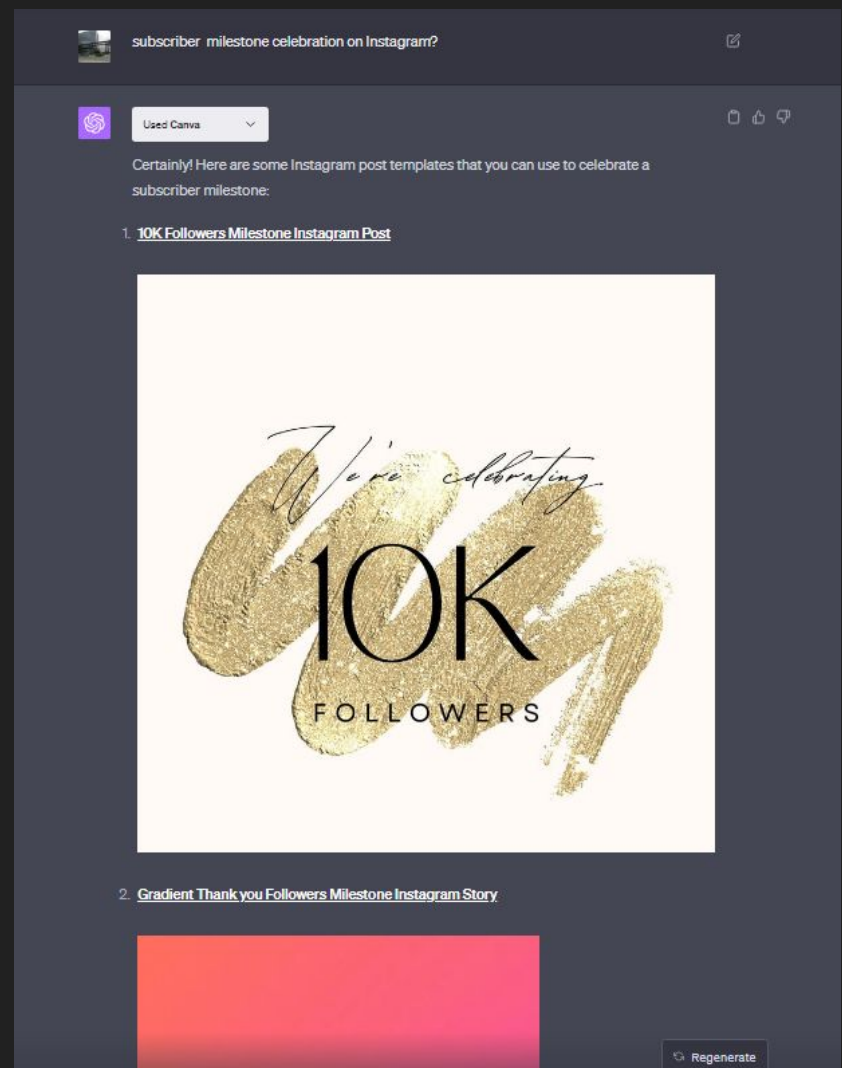

Example 1 : Youtube thumbnails

Suggest me some youtube thumbnails templates?

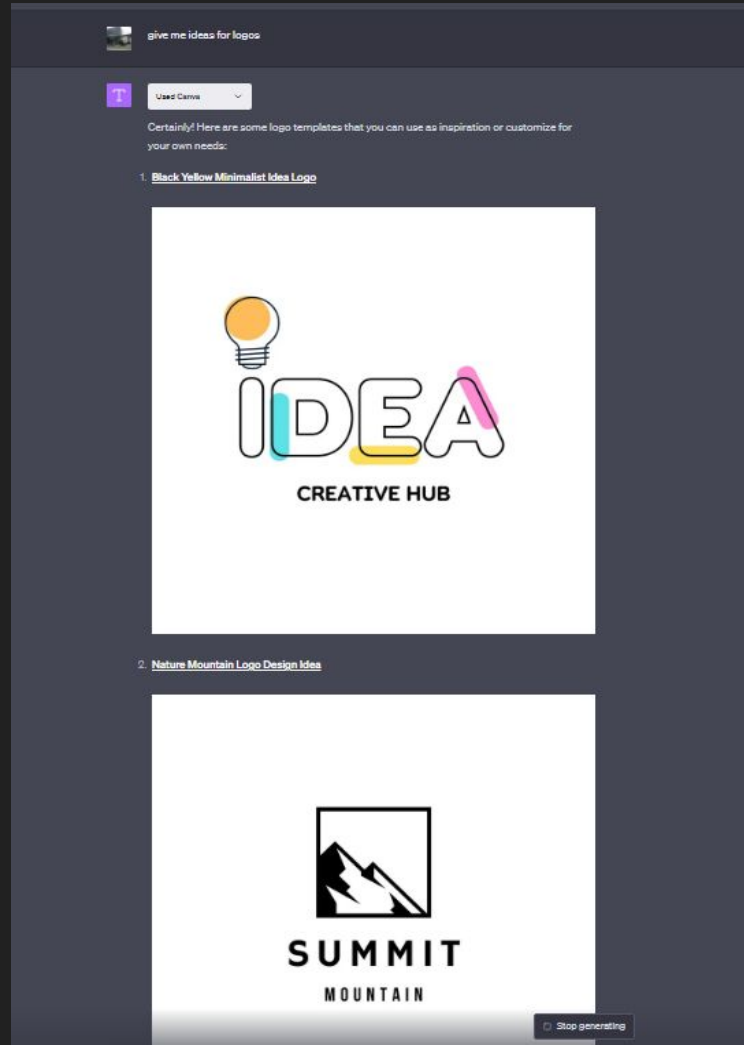

Example 2 : Instagram

subscriber milestone celebration on Instagram?

Example 3 : Logos

give me ideas for logos?

Example 4 : Brochure

create a brochure for my new restaurant which serves italian cuisine

create a brochure for my new restaurant which serves italian cuisine

Used Canva

Great! Here are some brochure templates that you can use to showcase your new restaurant serving Italian cuisine:

1. [Red Green Italian Pizza Menu Trifold Brochure](#)

2. [Cream and Brown Minimalist Resto Brochure](#)
